

Commercial Drywall Database

The Commercial Drywall Database gives you the information you need to begin estimating productively right away.

Thousands of standard industry items—from stucco and metal studs to drywall and ceiling panels—are included to get you started. Just add your own pricing and you're ready to go.

You can also customize the database to fit your unique needs. Sage Timberline Office and Sage Master Builder make it easy to add your own items, formulas, assemblies, and productivity and conversion factors to the database as you estimate.

The database also includes Smart Assemblies that let you take off even the most complicated building component, like a metal stud wall, in one step. For example, when taking off an interior metal stud wall, simply enter one set of dimensions and the assembly will generate labor and material costs for the studs, top and bottom track, pins, bracing, sheetrock, and more.

General Database Specifications

- 1661 Items
- 558 Formulas
- 14 Bill of Materials Classes
- 38 Smart Assemblies within the following Divisions:
 - General – Conditions
 - Stucco – Walls and Framing
 - Drywall – Walls and Framing
